Trading is hard. Ninety-five percent of all traders lose.

We vet and platform professional traders for you to follow. Every trade the trader takes is copied directly to your segregated broker account. You take the exact same trades as the trader without lifting a finger. You pay the trader 30% of the gains he produces for you each month. That is his reward.

WHAT WE DO

Trading software and indicators

Native algorithms and analytical tools for platforms like TradingView and MetaTrader 5.

Strategy verification

Live trading performance tracked independently, through third-party verification on Myfxbook.

Education and research

We teach people how to read market data, analyze drawdowns, and choose A-Book brokers: brokers that pass orders straight to the live interbank market.

WHAT WE ARE NOT

Not a broker or a fund

We never touch, hold, or custody member funds. Every account is opened and controlled directly in the member's own name at a regulated broker.

Not financial advisors

We operate strictly as an education and software provider under the publisher's exclusion. We do not offer personalized investment advice and we do not manage client capital.

Not a rug pull

There is no pool to close. Money sits in an account you own, at a broker that answers to a regulator.

Four steps. Your account, your name, your control.

1

Open your own account

At one of our partner A-Book brokers, BlueStarFX or Aeron Markets. The account is in your name. The money never leaves it.

2

Choose a vetted trader

Waggy discovers and vets every trader before they reach the roster. Every strategy is verified live on Myfxbook, so you check the record before you follow it.

3

Trades copy automatically

Every trade the trader takes is copied into your account, the same trade at the same time. Nothing for you to do.

4

Pay only on gains

The trader earns 30% of the gains produced for you each month. No gains, no fee. You stay in control and can stop any time.

Watch it, don't read it.

Scott Morris

CO-FOUNDER

Scott has been online in the trading space for over 20 years. During that time he has developed trading indicators, automated systems for trading, managed PAMMs, and conducted live trading events across the US.

When Scott Wagstaff, aka Waggy, joined Scott they co-founded Sterling Capital Technologies for the purpose of educating traders and setting up the most sophisticated social trading company in the world.

Scott Wagstaff “Waggy”

CO-FOUNDER

Scott Wagstaff, better known as “Waggy,” is a professional forex and futures trader with more than a decade of experience in the markets. His trading journey began with an introduction to algorithmic strategies, sparking a fascination with the intersection of technology, data, and human decision-making. Before entering finance, Waggy built a diverse career in entertainment, working across film and television as an actor and producer, while also pursuing real estate ventures. That unconventional background sharpened the instincts he now brings to trading: discipline under pressure, creative problem-solving, and the ability to recognize genuine talent.

Today, Waggy is the co-founder of Sterling Capital Technologies, where he is focused exclusively on advancing financial technology and trader development. He leads the discovery and vetting of trading talent, educates aspiring professionals on what separates a capable trader from a great one, and helps build and source high-quality indicators, algorithms, and trading systems.

Jaz Escamilla

CO-FOUNDER

Jaz Escamilla is the technologist and systems architect behind Sterling Capital Technologies, designing and running the company's digital backbone: the website and open education hub, the live verified performance feeds, member onboarding, and the automation and security that keep a growing global community running around the clock.

Where Scott sets the vision and Waggy vets the talent, Jaz builds the machine: engineering, infrastructure, brand and media production, and the tools members touch every day. Watch a briefing, check a live record, or activate a strategy on the site and you are using something Jaz built.

Steven Torres

CHIEF OF STAFF

Steven Torres is Chief of Staff at Sterling Capital Technologies and the operational link between its three co-founders. Working across Scott's vision, Waggy's trader vetting, and Jaz's technology, he keeps the moving parts of a global platform in step: managing systems and platform logistics on the administrative side, carrying priorities between departments, and making sure what gets decided actually gets done.

His second mandate is integrity. Steven leads account verification and validation, confirming that every member account is correctly connected, properly set up, and performing exactly as designed. He runs the system checks that catch issues before members ever feel them, and holds every account to established procedures, processes, and protocols.

Founded to provide training, social trading, and an array of very sophisticated trading bots and systems.

Their own accounts, their own numbers.

SENTINEL Z

“Here’s my actual NET results for Sentinel Z, June 2 through July 1. A fantastic 25% return for the month, after all fees! These are my numbers, my personal account, your mileage may vary 😊”

Eric S.
MSG 21207 · 2 Jul 2026

SENTINEL · X · Z · MERIDIAN

“I have been diversified in Sentinel, x, z and Meridian, and I’m in profit with the 4 accounts combined. I started these around the minimums but I’m happy that today I woke up to all accounts intact and still in profit. Onward and upward!”

Eric S.
MSG 21588 · 5 Aug 2026

SENTINEL + MERIDIAN

“Sentinel is certainly killing it. Together with Meridian I’m circa 40% of the way to recovering from GE in two months! At this rate should be at breakeven within 3 months and looking at doubling the account with 6-7 months. Not too shabby 🤪”

Arthur Magoulianiti
MSG 19659 · 18 May 2026

Arthur Magoulianiti	“And with that last trade, I have recouped in 3 months what I lost from GE. Baddabing Baddaboom!... Time to take out my seed capital and trade with the house money!”	21439 · 23 Jul

SENTINEL Z

“Also a shout out to Sentinel Z. I think your best yet. I’m also interested in your coming attractions. With Wags as your Sherlock Holmes my confidence abounds. Good luck to us all.”

James Vaas

MSG 21085 · 26 Jun 2026

RISK MANAGEMENT

“One of the things that we have in Sterling Capital that I appreciate the most is having critical stop loss which prevents having accounts wiped out. I am also really impressed and appreciate what we have with Sterling Capital. So, to our success, forwards and onwards.”
