

Sterling *Strike*

Automated trading.
Personal service.

A daily breakout strategy with a concierge, algo team and broker in your corner.

THE DAILY BREAKOUT

ILLUSTRATIVE STRATEGY DIAGRAM

The people behind your trading

Once your settings are agreed, the algorithm handles the trades. The relationship gives you people to return to.

01 Your concierge

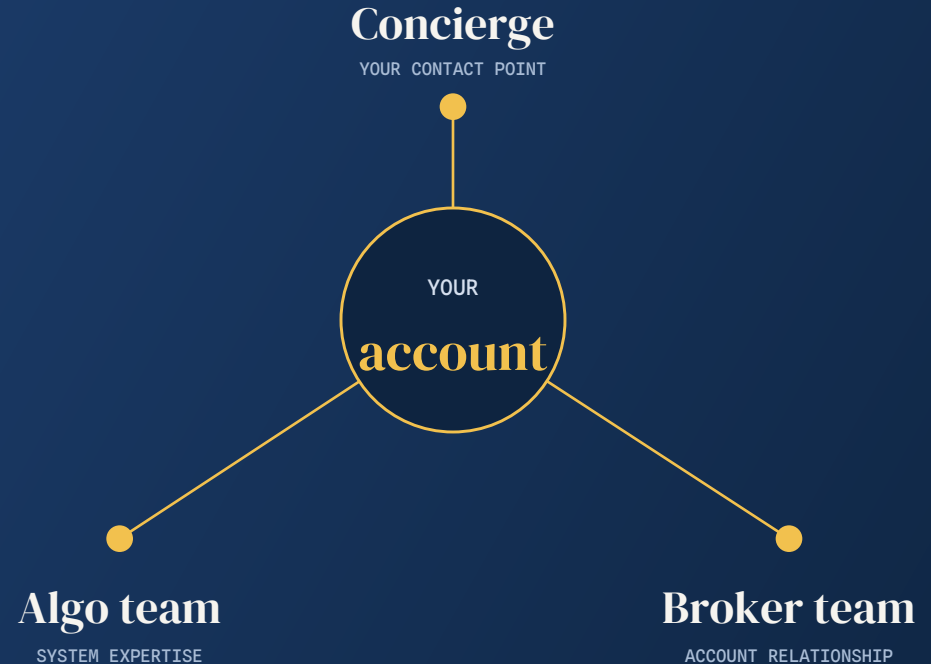

A direct route to support.

02 The algo team

Knowledge of the systems.

03 Your broker

A conversation about your account.

Relationships built to last

The team reports client relationships dating back to 2018, with accounts continuing to trade through years of changing markets.

2018

2022

2026

The broker relationship

Clients begin using the team's systems.

A client history begins

The supplied account record starts in February.

The relationship continues

Clients can keep returning to the team.

Dates describe the team and client relationships, not a 2018 launch date for the Sterling Strike brand.

Trend. Bracket. Reset.

90%+

Sterling-reported win rate

Winning trades as a share of trades.
This does not measure the size of wins
or returns.

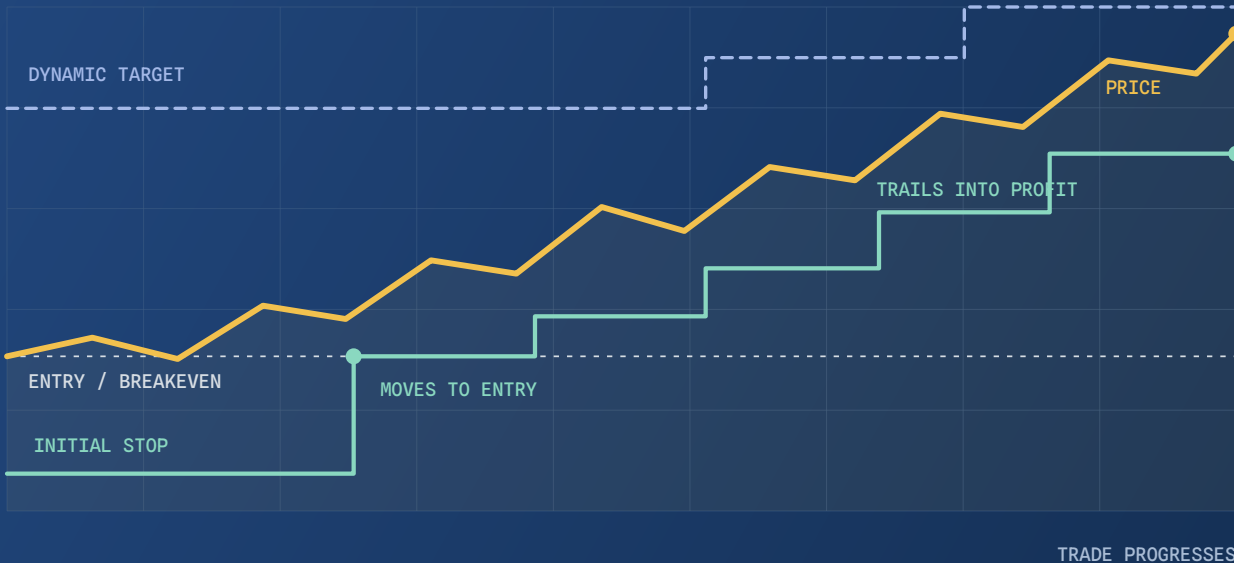

01 BRACKET PRICE

02 TRADE THE BREAK

03 RESET DAILY

Midnight GMT. One side triggers; the other cancels. Diagram is illustrative, not a price history.

A stop and target that move

01

Move to breakeven

As price advances towards its target, the stop moves to entry.

02

Keep trailing

The stop trails into profit. The take-profit level can adjust to allow further trailing profits.

Illustrative, not to scale. Breakeven is entry price before costs. Stop and target adjustments depend on settings and execution.

Support at your pace

Stay hands-off once your settings are agreed, or speak with the team as often as you like.

Contact Support opens a deeper conversation. Where appropriate, that can include the algo team, Oliver, Robert and the Aeron broker team.

SUPPORT
Something else

DETAILS (NEEDED FOR PAIR PREFERENCES AND ANYTHING ELSE)

e.g. EURUSD, GBPUSD

Automation handles execution. People handle the conversation.

Experience on your side

Oliver Templeton
Robert Shutler

and the Aeron Markets broker team

They know the algo team and the systems inside out, from years of use across multiple client accounts.

Allocation sizes are reported client-account context; they are not a return measure or a required minimum.

5 / 6 / 7

FIGURE ACCOUNT ALLOCATIONS

Experience includes individual client allocations of five, six and seven figures.

Talk through your needs. Agree your settings. Let the team handle the technical changes.

Your settings. Your choice.

Conservative

Smaller position sizes and lower exposure for clients who want to trade with less risk.

Moderate

STANDARD PRESET ONLY

10%

Stop loss

1.57%

Take profit

Starting levels. The stop and target adjust dynamically.

Higher risk

Larger position sizes and higher exposure, with greater potential gains and losses.

Agree your profile with your concierge and/or broker. Request changes, pauses or restarts.

A history you can examine

No performance fee on Strike trading

0%

performance fee

Your trading profits remain in your account after broker commissions and other trading costs.

BROKER COSTS STILL APPLY

Commissions, spreads, swaps and other applicable account charges affect the amount you retain.

Your account. Your visibility.

01

In your name

The broker holds your trading account in your own name.

02

In your control

You control deposits and withdrawals.

03

In your view

See every trade on MetaTrader 5, on desktop or phone.

YOU

YOUR BROKER ACCOUNT

MT5

Sterling provides software and education. Your broker holds the trading account.

From first conversation to live trading

01

Meet your concierge

The team helps you with the account and technical setup.

02

Open your account

Your brokerage account stays in your own name.

03

Agree your settings

Choose the risk profile and discuss how you want to trade.

04

Let Strike trade

The team applies your settings. Automation handles execution.

Stay in touch as often or as little as you like.

Lifetime algo access. *People in your corner.*

Your algorithm. Your concierge. Your broker relationship.

An automated daily breakout service with a team you can speak to about your settings, your account and the years ahead.

How to read this briefing

Product mechanics

Dynamic stop loss, dynamic take profit and the standard moderate settings are based on Sterling's 23 October 2026 product briefing.

Reported win rate

The 90%+ win rate is reported by Sterling. The account, measurement period and sample size were not supplied. Win rate counts winning trades; it is not a measure of returns.

Client history

The supplied Myfxbook record covers one client, with Strike followed by the full Elite service. Results are before all client costs. The 2024 monthly chart ends in November as supplied.

Trading risk

Forex and leveraged trading involve substantial risk. Capital is at risk. A stop loss, including a breakeven or trailing stop, does not eliminate the possibility of loss.

Outcomes

Past performance does not guarantee future results. Results vary with market conditions, settings, execution and costs. Diagrams explain the mechanics; they are not forecasts.
